Section I: Overview

Features

The ProLaw DMS Connector is configured on the server (there is no ProLaw client to install in order to configure the connector).

When the message is submitted through the AccuRoute server for processing, the meta-data that was collected during the IIC actions is inserted into the appropriate fields in the imported document in the ProLaw database.

Requirements

Server 1

- AccuRoute v4.0 with AccuRoute Extensions for ProLaw
- Tier 2 DMS connector license

Server2

- The ProLaw server is the SQL server 2005 or later

Client 1

- Windows 7, 32-bit or 64-bit
- .NET framework version 2 or newer installed before you install the ProLaw client
- AccuRoute Extensions for ProLaw client, as found in the **clients** directory:

`\\accuroute_server_name\Omtool\clients\ExtensionsForProLaw`

Note AccuRoute Extensions for ProLaw requires an internet connection. After 30 days, an error will occur without this connection.

Section 2: Installation

```

For example:

```
Server=Srv100\ProLaw;database=ProLaw:Trusted_Connection=yes:User ID='Production\ProAdmin;Password='Pr0Admin'
```
- 9 Click **Test** to test the connection string to the ProLaw database.

The example used in the following procedure creates the required property **DMSMatterID**.
